

Portex™ Dry Heparin Arterial Blood Sampling Kits

Device Classification

Class IIa

GMDN

Code Number: 31336

Term: Blood Sampling Kit, Arterial

Device Description

The Dry Heparin Arterial Blood Sampling Kit is a single-use, in-vitro diagnostic device designed for the drawing of arterial blood. This product is not for injection. It is provided sterile and non-pyrogenic.

The material used to manufacture this arterial blood sampling kit is not made with natural rubber latex.

Indications

The arterial blood sampling syringe with Calcium Neutralised Dry Lithium Heparin is intended for sampling of arterial blood for the measurement of pO₂, pCO₂, pH, CO-oximetry, electrolytes (Ca⁺⁺, Na⁺, K⁺, Cl⁻, and Mg⁺⁺), Total Magnesium, and the metabolites Glucose and Lactate. Dry Lithium Heparin is neutralised for Ionic Calcium. The syringe is heparinised for anticoagulant effect.

Precautions*

Follow the standard infection control procedures as specified by the CDC and OSHA standards (USA) or local equivalent. Do not reuse. Procedure should be performed by a trained and properly qualified person.

Mixing and Sample Analysis*

After sample collection, sample should be mixed by holding syringe in hand and rotating wrist back and forth for 20 to 30 seconds. Sample should be analysed within 30 minutes. Follow NCCLS guidelines or health care facility protocol.

Device Components

Pro-Vent™ Syringe

Each Portex Pro-Vent dry heparin arterial blood sampling kit consists of a heparinised syringe, a Filter-Pro™ air bubble removal device and may include a needle, needle stopper and needle protection device.

LineDraw™ Syringe

Each Portex LineDraw dry heparin arterial blood sampling kit consists of a heparinised syringe and a Filter-Pro air bubble removal device.

Pulsator™ Syringe

Each Portex Pulsator dry heparin arterial blood sampling kit consists of a heparinised syringe, a Filter-Pro air bubble removal device and may include a needle, needle stopper or a needle protection device.

Component Composition

- › Syringe: Polypropylene
- › Plunger: Polypropylene
- › Heparin Type: Porcine intestinal mucosa based, neutralised for ionic Ca⁺⁺
- › Heparin Volume: Approximately 23 I.U. per mL
- › Low Heparin (LH) Volume: Approximately 7.0 I.U. per mL
- › Needle Hub: Polypropylene
- › Needle: Stainless Steel
- › Sheath: Polypropylene
- › Lubricants: Silicone
- › Needle Stopper: PVC
- › Filter Pro: Acrylic and polyethylene filter
- › Needle-Pro™: Polypropylene
- › Needle-Pro EDGE™: Polypropylene, Stainless Steel, Acrylic Adhesive

Legal Manufacturer Site Name and Address

ICU Medical, Inc.
6000 Nathan Lane North
Minneapolis, MN 55442 USA

Country of Origin

USA

Sterilisation Method

Ethylene Oxide. The products are for single-use only and they cannot be re-sterilised.

Shelf-Life

A 3-year expiration date is assigned to the product as long as the packaging is undamaged and unopened.

Labelling and Packaging

One (1) ABS unit is packaged in a flexible, peel-open blister or in a polyethylene bag with product specific information. Product is sterile, non-toxic and non-pyrogenic unless package is open, wet, or damaged. Discard if open, wet, or damaged. Cases are packed as two hundred (200) units. PG-suffix products are packaged in four (4) shelf boxes of fifty (50) units. All others are packaged as four (4) bags of fifty (50) units. The lot number and expiration date are located on the pack. The manufacturing date is located on the shipper box.
