## FLOW eco fat killer

Alkaline detergent booster on an ecological basis

### Product No

E522851

### Properties

- based on 100% renewable active ingredients
- outstanding fat and protein dissolving power
- short soaking time
- highly effective at temperatures as low as 40°C
- phosphate-free
- excellent washing performance even with high water hardness
- very good complexing of iron, manganese and copper
- non-foaming
- high dispersing capacity

### Application

FLOW eco fat killer is a non-foaming detergent booster that is perfectly matched to FLOW brightener. Due to its high content of water hardness reducing substances, FLOW eco fat killer is also suitable for washing machines that operate without softening systems.

FLOW eco fat killer is non-foaming, both at lower temperatures around 40°C and at high temperatures and is therefore well suited for use in steam-heated washing machines or washing stations.

The high alkalinity leads to rapid fat saponification and corresponding removal of grease stains. The natural complexing agents prevent catalytic damage caused by iron, copper or manganese ions during bleaching with FLOW bleach agent and ensure a high dispersing capacity, which prevents greying back even with high dirt loads. FLOW eco fat killer is dosed with 2–8 ml/kg of laundry, depending on water hardness and degree of soiling.

## Technical data

Density (20°C) 1.24 g/ml

pH value (conc.) 14

## Dosage recommendation

(ml/kg laundry)

Water hardness*			
Hardness area	Prewash	Main wash	Only main wash
<b>0–6</b> <b>soft</b>	1	2	2
<b>7–13</b> <b>medium</b>	2	4	6
<b>&gt; 14</b> <b>hard</b>	3	5	8

\*You can find out the degree of hardness or the water hardness in degrees of German hardness from your local waterworks.

## Notes

Storage:

Store in a dry place and away from frost. The product is sensitive to frost and must not be stored at temperatures below 0°C. Irreparable damage is possible. After removal of partial quantities, the container should be resealed. The product can be stored for at least 24 months in the sealed original container.

Due to the natural substances used, there may be a visible dark cloudiness in the lower part of the container. This cloudiness has no effect on the washing performance of the product.
